Address: Kalutara, Sri Lanka

OBJECTIVE

As an enthusiastic 3rd-year undergraduate specializing in Software Development and Quality Assurance, I am eager to apply my technical knowledge and analytical skills in a professional environment. I am dedicated to delivering high-quality software solutions while continuing to develop my expertise in modern technologies like Java, React, and automated testing.

EDUCATION

- **B.Sc. (Hons) in Software Engineering (2024 – Present)**
 - National School of Business Management – Faculty of Computing (NSBM Green University)
- **GCE Advanced Level Examination (2021) – Commerce Stream**
 - Bandaragama National Collage, Bandaragama
 - Accounting, Business Studies, Economics
- **NVQ Level 4 in ICTT – NYSE Panadura (2022)**
- **Level 1 in Spoken English – University of Colombo**

PROJECTS

Ground Booking System-Developed a web application to streamline sports ground reservations and prevent double-bookings. Implemented real-time slot availability checks and an efficient Admin Dashboard for venue management's Stack: [CSS, React, Node.js] | Database: [MySQL]

Omi Royal Game- I developed a high-performance Omi simulation in Flutter, achieving 60FPS through custom vector optimization and memory management. The application features a robust rule engine for traditional mechanics like 'Renou' and 'Kapothi,' integrated with intelligent AI bot logic and seamless English/Sinhala localization with culture-specific 'Seporu' scoring, all within a clean, production-ready codebase.

Real-Time High-Concurrency Booking Engine-I developed a high-traffic reservation system using React, Node.js, and MySQL, ensuring data integrity through pessimistic locking. The system features real-time inventory synchronization via WebSockets, an automated dynamic pricing algorithm based on occupancy, and a background worker for efficient seat release management.

Task Flow: Full-Stack Kanban Board & Automated QA Pipeline- I developed a full-stack Kanban task manager using React and Node.js, ensuring enterprise-grade reliability through robust Jest API testing and high-speed Playwright E2E tests. By maintaining a clean architecture and optimizing performance, I achieved full user flow execution in under 750ms.

TECHNICAL SKILLS

- **Languages** – JavaScript, Python, Dart, Java, HTML & CSS
- **Frontend & Web Development** - React, Flutter, CSS
- **Backend & APIs** - Node.js (Express)
- **Databases & Infrastructure** - MySQL,

SOFT SKILLS

- **Leadership & Communication** – Coordinated and led several university project teams of 6 –10 members.
- **Mentoring & Tutoring** – Head Prefect in Gungamuwa.K.V

EXTRA CURRICULAR ACTIVITIES

- **Member** – FOSS Community, NSBM Green University

CERTIFICATIONS

- **Python for Beginners** - University of Moratuwa
- **Foundational Project Management** - University of Moratuwa
- **Project Management** – Simple Learn SkillUp
- **ICTT NVQ level 4** – NYSC Panadura
- **Spoken English Level 1** – University of Colombo

WORKING EXPIRENCE

- I received a six-month training at Peoples Bank under the IT Coordinator
